

Our Generator Service Division is staffed by a team of highly skilled technicians and managers with a comprehensive electrical and mechanical knowledge of the power generation industry. This experience enables us to provide a professional and efficient service to all of our customers ranging from data centres to hospitals, offices to hotels.

**ADE Power offers a variety of innovative and cost effective solutions for routine maintenance of power generation equipment, this can be tailored to the client's specific maintenance requirements.**

It is vital to have a planned maintenance program. To ensure the performance of your generator, our servicing agreements include regular maintenance items, health checks, remedial works and guaranteed call out response times.

**Our service vans are strategically stocked with critical manufacturer approved parts, to ensure a first time fix, giving you total peace of mind that your power system is operating at peak performance.**

**ADE Power Limited**
